DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Shibata et al-6,139,561.

Shibata-'561 (Fig. 1-12, 15-28, for example) discloses ultrasonic probe 5, ultrasonic transducer/oscillator 3, movable jaw 10, movable handle 8 arranged on the same side as the movable jaw 10 with respect to the central longitudinal axis of the main body 6, cord 9 connecting the ultrasonic transducer/oscillator 3 to a drive circuit (not shown), sheath 7, main body 6. Wherein movable handle 8 arranged on the same side as the movable jaw 10 with respect to the central longitudinal axis of the main body 6 substantially as recited in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3734

Claims 3 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shibata et al-6,139,561.

As to claims 3 and 14, Shibata-'561 does not explicitly disclose a drive circuit as recited in the claims. However, the drive unit as recited in the claims is well known in the art. It would be obvious to one of ordinary skill in the art to provide Shibata et al-6,139,561 device with a drive unit circuit as recited in the claims, as this circuit is well known and suitable for an ultrasonic device such as the device of Shibata et al-6,139,561.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 571-272-4692. The examiner can normally be reached on Monday-Tuesday and Thursday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jackie Ho can be reached on 571-272-4696. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
